Observability lock-in.

We built the way out.

Deterministic.
By design.

Empirical live environment that validates assumptions.

STEP 01	Analyzed real Datadog documentation and **mapped** every dashboard
STEP 02	Functionality hand-reviewed with very few best-effort assumptions
STEP 03	**Migrated** into OpenTelemetry and Perses
STEP 04	Detailed report **explains** every classification

>70% migration success rate

WITH US

WHY OUR SOLUTION

Deterministic core.
Customer-first.

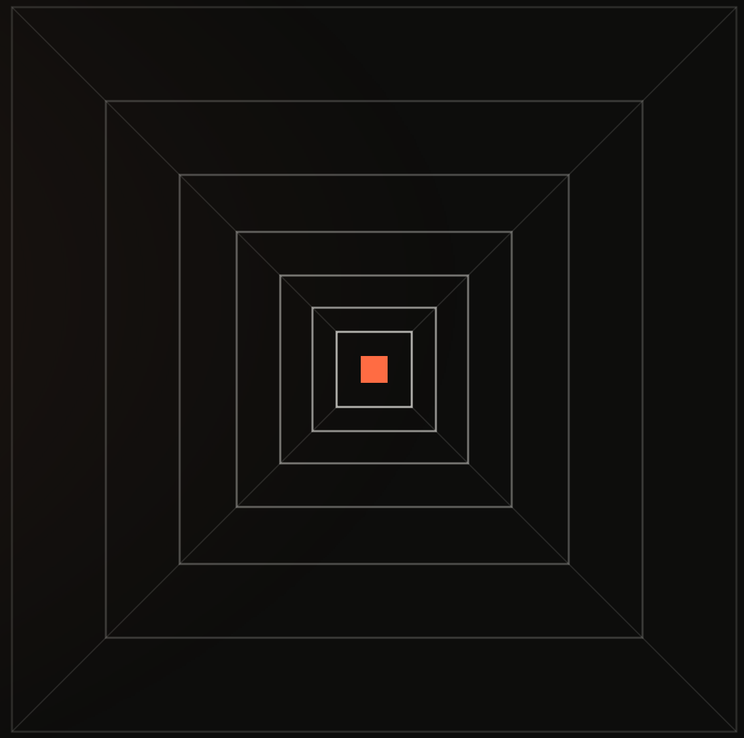

01	02	03
Strong deterministic focus	**Opt-in LLM support**	**Better customer experience**
Strict rules, open standards	Used only for edge cases	Guided onboarding
Deterministic by default	Expands coverage without risk	Automated variance checks
Tested end-to-end	You stay in control	Custom agents on demand

Datadog to Dash0.

Thank you.

Deterministic migration
that builds **trust**.
